

Orlando, 2015

██████████,

It's been a tough couple of years. Our dream for so long, Platinum Palms Crab & Wine Bar outside of Pensacola, closed its doors for good this March. Now, Timmy and I are back in the web development space and seeking new accounts. Our new studio, Feral, partners with creative agencies like ██████████ to support digital client work, whether that be marketing websites or apps and tools of various sorts.

We have absolutely loved your work for years, and had it not been for an impassioned plea from a local high school design talent by the name of Sally May (and an attractive price of \$85), we would have loved to have worked with you on the branding for our Platinum Palms line of restaurants. Perhaps it would have been the difference.

Please have a look at our new site and let us know if there might be any opportunities to collaborate in the future.
